The First Year. The work of the first year is prescribed. In addition to the required courses, all first-year students perform individual assignments in a tutorial program conducted under the direction of a member of the faculty. In this program each student is assigned to a tutor, who is one of the Bigelow Teaching Fellows. The tutorial work emphasizes training in research, in the preparation of legal memoranda and other forms of legal writing, and in oral argument. Several of the assignments each year are based upon problems currently presented in actual cases, both trial and appellate, which are heard in the Weymouth Kirkland Courtroom of the Law School by courts of Illinois. A final examination is given in each course at the end of the quarter in which the course is concluded, except that in Civil Procedure and in Property a final examination is given on each quarter’s work in the course. Interim or practice examinations are usually given in one or more of the other courses at the end of the Autumn or Winter Quarter.

The Second and Third Years. The program of the second and third years is elective. The normal course load permits a student to plan a well-rounded program of studies and also to pursue some special interests beyond the basic level. The seminar offerings provide opportunities to explore developing areas of the law, to pursue interdisciplinary aspects of particular legal fields, and to work on individual problems involving research and drafting. In addition, students who wish to develop further their facility in research and writing, or to do intensive work on a particular topic not the subject of a regular seminar, are encouraged to call upon members of the faculty for supervision of individual research projects. Such work may be undertaken for credit (see Law 499 below).

Students are advised to give thought to the over-all plan of their studies for the second and third years before registering for the second year, although it is to be expected that any general plan may undergo considerable revision as the student’s knowledge and interests in the law develop. Each student is assigned a faculty adviser when he enters the Law School, and students are encouraged to consult the faculty adviser or other members of the faculty in selecting their programs.

In order to achieve credit for 135 course hours in nine quarters, a student must take an average of 15 course hours per quarter. Except with the permission of the Dean, no student may take more than 17 course hours in any quarter. Each student is responsible for keeping himself informed of the number of additional credits he requires for graduation.

In the course and seminar descriptions the number in parentheses at the end of the description represents the value of the course or seminar in terms of course hours per quarter.
