Under the usual tort rules, damages for an accident equal the victim’s loss (compensation). This paper departs from current law by proposing damages equal to the injurer’s gain from untaken precaution divided by the probability of liability (disgorgement damages for accidents, or DDA). DDA is the minimum liability necessary to provide injurers with efficient incentives for care. DDA is smaller than compensation, so it typically induces more activity by injurers and less activity by victims. Calculating DDA generally requires different information than compensation. Consequently, some imperfections in information cause courts to distort incentives for care under compensatory damages and not DDA, while others have the opposite effect. Furthermore, the smaller size of damages under DDA compared to compensation can shrink or magnify the distortion in incentives for care caused by court and injurer errors. We distinguish three forms of DDA with different information requirements and the same incentive effects.

* Robert Cooter is Herman Selvin Professor of Law, University of California at Berkeley.
** Ariel Porat is Alain Poher Professor of Law at Tel Aviv University, and Fischel-Neil Distinguished Visiting Professor of Law at the University of Chicago Law School.
The authors thank Omri Ben-Shahar, Hanoch Dagan, Avihay Dorfman, Yehonatan Givati, Adi Libson, Jacob Nussim, Gideon Parchomovsky, Oren Perez, Avraham Tabbach, Barak Yarkoni, an anonymous referee, the participants of the 2014 American Law and Economics Association Annual Meeting, and the participants at workshops at Bar-Ilan University and Tel Aviv University, for very helpful comments, and to Hed Kovetz for valuable research assistance.
